

- Funding will go for Military Construction and Facility Improvement Projects - Washington, DC – U.S.

Reps John Hall (D-NY19) and Maurice Hinchey (D-NY22) announced today that the U.S. Military Academy at West Point will be receiving \$19.6 million in funding from the recently enacted Economic Recovery Package that Hall and Hinchey helped pass. Hinchey and Hall are both members of West Point's Board of Visitors.

The Recovery Package will also be providing Stewart Air National Guard Base with \$3.6 million for base repairs. The funding for Stewart and West Point will go towards military construction and facility improvement projects.

"The recovery funding going to Stewart and West Point will create jobs and stimulate economic activity while improving the quality of life for service members, their families, and defense civilian workers," said Congressman Hall. "Key projects are also promoting our country's energy security through energy conservation measures included in the facility improvement projects."

"This funding demonstrates another way of how the economic recovery package is having a positive impact here in the Hudson Valley," Hinchey said. "This \$23.2 million will create local jobs that will result in much-needed improvement to the facilities at Stewart National Air Base and West Point. By investing in our local military facilities today we are promoting economic growth in the Hudson Valley while also improving the conditions in which our current and future military leaders work and operate."

Examples of the specific projects that the American Recovery and Reinvestment Act will provide funds for are below:

Recovery Funds for Stewart Air National Guard Base
